

# Publication Summary

## Scottish Breast Screening Programme Statistics 2010-11

Annual update to 31st March 2011

Publication date – 24 April 2012

### About this Release

Annual update of breast screening statistics to 31st March 2011; includes NHS Breast Screening Programme Performance Standards, attendance figures, cancer detection rates, biopsy results and screening outcomes.

### Key Points

**Figure 1. Percentage uptake<sup>1</sup> rates by NHS Board of Residence: 1<sup>st</sup> April 2006 to 31<sup>st</sup> March 2011. Three year rolling periods<sup>2</sup>, females aged 50-70**

1 Only routine appointments are included in the above figures. Self/GP referral and early recall appointments are excluded.

2 Women are invited to attend screening once every three years and NHS Boards are not necessarily screened evenly throughout the three year period.

3 New NHS Board areas including parts of former Argyll & Clyde.

NHSBSP Performance Standards, at 31st March 2011:

- Looking at three year performance standard attendance figures, uptake remains similar to last year, at approximately 75%.
- All NHS Boards continued to exceed the minimum performance attendance standard of >70% of women invited during the previous three years (Figure 1).
- In 2010-11, all NHS Breast Screening Programme Minimum Performance Standards and all but 2 of the targets were met.

## Background

The UK was one of the first countries in the world to establish a national population-based breast screening programme. The UK National Health Service Breast Screening Programme (NHSBSP), a UK-wide programme of free mammographic screening for breast cancer, was introduced in 1988 following a recommendation from a working party established by the four UK Departments of Health and chaired by Sir Patrick Forrest.

Within Scotland, data are collected by each of the six screening centres (which are supported by 19 mobile units) and retained on the Scottish Breast Screening Programme (SBSP) Information System. More information on the SBSP dataset can be found on our [Data sources](#) page. Data are routinely extracted from the SBSP Information system and analysed by ISD Scotland to help evaluate and monitor the effectiveness of the programme in Scotland.

Further information can be found in the [Full Publication Report](#) or on the [ISD website](#).

### About ISD

Scotland has some of the best health service data in the world combining high quality, consistency, national coverage and the ability to link data to allow patient based analysis and follow up.

Information Services Division (ISD) is a business operating unit of NHS National Services Scotland - and has been in existence for over 40 years. We are an essential support service to NHSScotland and the Scottish Government Health Department and others, responsive to the needs of NHSScotland as the delivery of health and social care evolves.

### Official Statistics

Information Services Division (ISD) is the principal and authoritative source of statistics on health and care services in Scotland. ISD is designated by legislation as a producer of 'Official Statistics'. Our official statistics publications are produced to a high professional standard and comply with the Code of Practice for Official Statistics. The Code of Practice is produced and monitored by the UK Statistics Authority which is independent of Government. Under the Code of Practice, the format, content and timing of statistics publications are the responsibility of professional staff working within ISD.

Further information on ISD's statistics, including compliance with the Code of Practice for Official Statistics, and on the UK Statistics Authority, is available on the [ISD website](#) [www.isdscotland.org/About-ISD/About-Our-Statistics/](http://www.isdscotland.org/About-ISD/About-Our-Statistics/)
