

Publication Summary

Dental Statistics – NHS Registration and Participation

Update of pages as at 30th September 2012

Publication date – 26 March 2013

About this Release

This release provides information on NHS General Dental Services (GDS) registrations as at 30th September 2012. Information on the participation (contact with an NHS dentist) of these registered patients can also be found in this release.

Key Points

- The level of the Scottish population (all ages) registered with an NHS GDS dentist was 79.8%, up from 78.0 % at 31st March 2012.
- Among mainland NHS boards, Dumfries & Galloway and Greater Glasgow & Clyde had the highest level of children registered (89.2%), while Ayrshire & Arran had the highest level of adults registered (83.9%); Ayrshire & Arran also had the highest level of total population registered (84.9%).
- Among mainland NHS boards, Grampian had the lowest level of children (77.1%), adults (56.0%) and total population (60.2%) registered.
- Nationally, the rate of participation in NHS General Dental Services among registered patients over the last 2 years was 87.5% for children, 77.1% for adults and 79.3% for all registered patients; these results are very similar to those of March 2012 (87.4%, 77.4% and 79.6% respectively).
- Participation rates for children were highest in Borders (92.5%) and lowest in Shetland (85.6%), while rates for adults were highest in Borders (86.4%) and lowest in Orkney (69.5%); rates for all registered patients were highest in Borders (87.9%) and lowest in Western Isles (74.4%).

Background

Since June 2010, ISD has been reporting registration levels based on the geography of patients' home addresses, rather than on the geography of the dental practice where they are registered.

Participation is a measure of patient attendance at an NHS general dental practice for treatment, registration or other form of contact within the last two years (in this release as at

30th September 2012). This measure further supports data already available on NHS dental registrations and the introduction of [non-time-limited registration policy](#).

About ISD

Scotland has some of the best health service data in the world combining high quality, consistency, national coverage and the ability to link data to allow patient based analysis and follow up.

Information Services Division (ISD) is a business operating unit of NHS National Services Scotland - and has been in existence for over 40 years. We are an essential support service to NHSScotland and the Scottish Government Health Department and others, responsive to the needs of NHSScotland as the delivery of health and social care evolves.

Official Statistics

Information Services Division (ISD) is the principal and authoritative source of statistics on health and care services in Scotland. ISD is designated by legislation as a producer of 'Official Statistics'. Our official statistics publications are produced to a high professional standard and comply with the Code of Practice for Official Statistics. The Code of Practice is produced and monitored by the UK Statistics Authority which is independent of Government. Under the Code of Practice, the format, content and timing of statistics publications are the responsibility of professional staff working within ISD.

Further information on ISD's statistics, including compliance with the Code of Practice for Official Statistics, and on the UK Statistics Authority, is available on the [ISD website](http://www.isdscotland.org/About-ISD/About-Our-Statistics/) www.isdscotland.org/About-ISD/About-Our-Statistics/
