

# Publication Summary

## Acute Hospital Activity And NHS Beds Information

Quarter ending March 2012

Publication date – 26 June 2012

### About this Release

This release comprises a quarterly summary of inpatient, day case and outpatient activity and bed statistics for NHSScotland up to March 2012. It also includes revised annual emergency admissions and bed day figures up to March 2011 for patients aged 65 and over and for the HEAT target on emergency bed days for patients aged 75 and over. Information on the number of British Association of Day Surgery (BADS) procedures is available for the period April 2009 to December 2011.

Where possible, any missing or incomplete data has been estimated using the last complete data submission for the relevant NHS Boards. Details of the affected data can be found within the [Full Publication Report](#) and are highlighted within the relevant tables. Data for the latest time periods should be treated as provisional.

### Key Points

- There were around 363,000 acute inpatient and day case discharges in the quarter ending March 2012. This is a slight increase of 1.5% when compared to the same quarter of the previous year.
- The total number of outpatient attendances for quarter ending March 2012 was around 1,186,000. This is an increase of around 0.4% on the quarter ending March 2011.
- There has been a decrease of 3.2% in the emergency bed day rate per 1,000 population for patients aged 75+ from 5,388 in 2009/10 to an estimated 5,217 in 2010/11.
- The number of available staffed beds in acute specialties was recorded as 16,669 in the quarter ending March 2012. This is a slight reduction of 0.5% on the number of beds from March 2011.
- In the month of March 2011, 80.7% of all elective BADS procedures were carried out as day cases or outpatients, showing an increase from 75.1% in the month of April 2009.

## Background

Outpatient, inpatient and day case activity data and beds information are collected across NHSScotland and are based on nationally available information routinely drawn from hospital administrative systems across the country.

The data contained within this publication are predominantly based on ISD(S)1 aggregate data returns. ISD(S)1 contains summarised data by NHS Board of Treatment, hospital and specialty, i.e. high level reports with no patient details.

It should be noted that outpatient, inpatient and day case figures may include an element of estimation for any incomplete or missing data submissions. Therefore, data for the latest time periods should be treated as provisional.

The provisional Scotland bed day rates for 'patients aged 65 and over' and 'patients aged 75 and over' for the year ending 31 March 2011 are estimates calculated from the "all Scotland" bed days total, excluding NHS Grampian, and the appropriate Scottish populations, excluding NHS Grampian residents.

## Further Information

Further information can be found in the [Full Publication Report](#) or on the [Acute Hospital Activity](#) pages of the [ISD website](#).

### About ISD

Scotland has some of the best health service data in the world combining high quality, consistency, national coverage and the ability to link data to allow patient based analysis and follow up.

Information Services Division (ISD) is a business operating unit of NHS National Services Scotland - and has been in existence for over 40 years. We are an essential support service to NHSScotland and the Scottish Government Health Department and others, responsive to the needs of NHSScotland as the delivery of health and social care evolves.

### Official Statistics

Information Services Division (ISD) is the principal and authoritative source of statistics on health and care services in Scotland. ISD is designated by legislation as a producer of 'Official Statistics'. Our official statistics publications are produced to a high professional standard and comply with the Code of Practice for Official Statistics. The Code of Practice is produced and monitored by the UK Statistics Authority which is independent of Government. Under the Code of Practice, the format, content and timing of statistics publications are the responsibility of professional staff working within ISD.

Further information on ISD's statistics, including compliance with the Code of Practice for Official Statistics, and on the UK Statistics Authority, is available on the [ISD website](#).
