

Monthly Prescribing Activity Data

Data for January 2017

Publication Date – 11 April 2017

About this release

The Information Services Division has released NHSScotland prescribing data for January 2017 in two formats - practice level Open Data and an interactive dashboard.

Find out more

Open Data files enable independent analysis of NHSScotland prescribing data. Information is shown for each practice and by individual drug. In response to feedback from users we have produced a prescribing dashboard to allow exploration of the Open Data file. Four interactive views are available:

- What are the highest cost therapeutic areas for prescriptions in the community?
- How do individual GP Practices contribute to overall GP Practice prescribing?
- What is the variation in Prescribing among the biggest GP practices?
- Where are the most prescriptions being written?

[Further information is available from the Prescribing webpages.](#)
