

Practice Team Information

Communications Update

Issue 04

Jul 06

Automated Extraction update – With the exception of a small number of practices, all PTI data is being extracted to ISD through an automated process that involves no practice involvement. All information will be extracted on the 6th of the month as before. If your practice has outstanding issues i.e. a backlog of data, a disc will be sent and a manual extraction will need to be completed as before. All queries regarding the issue of extended extract discs should be addressed to [Andrea Hainey](#) or [Ian Baillie](#).

PTI Team dynamic – Jamie Gray, the PTI Senior Project Development Manager, has successfully achieved the position of NCDDP Program Implementation Manager and will no longer be part of the PTI project. All communications previously addressed to Jamie should now be directed to [Meena Ghori](#), who has taken over Jamie's roles and responsibilities as Project Development Manager.

Invoices - For financial year 06-07 all invoices submitted for payment **must** have a purchase order number attached. Each practice has been allocated a number and should ensure that this is detailed on the invoice along with the existing vendor no and correct bank details. Please contact [Ian Baillie](#) if you have not received your practice purchase order number.

System development – PTI is currently working with [InPractice Systems](#) (InPs) to ensure that we have no problems extracting data from their system. This solution should be available later on this year. We have also approached [EMIS](#) to ensure that PTI practices considering moving to their system encounter no difficulties.

Read Code Dictionary – PTI are currently working on an updated version of the Read Code Dictionary to include all changes that effect GMS codes. This will be available in the near future.

Server Upgrades – Practices should ensure that if any work is carried out on their practice server that the PTI scheduled task (Tsk_cmr_extract_from_newgpass) in SQL has been re-enabled and functions as before. Not re-enabling the task will result in the auto-extract not running on the 6th of the month, as it should.
