

Publication Summary

National Drug and Alcohol Treatment Waiting Times Report

October-December 2014

Publication Date – 31 March 2015

About this Release

The Scottish Government's HEAT standard for drug and alcohol treatment states that 90% of people who need help with their drug or alcohol problem will wait no longer than three weeks for treatment that supports their recovery.

This drug and alcohol treatment waiting times report contains new data from 1st October to 31st December 2014 at national, NHS Board and Alcohol and Drug Partnership (ADP) level. It contains information on the number of people seen for treatment, the time waited and types of treatment accessed.

This publication now includes waiting times data for drug and alcohol treatment in prison. However, this is a new area of data collection and it will take time to embed the system and assure the quality of the data. Consequently, prison waiting times data is published separately but is expected to be the same level of performance in line with the delivery of the HEAT standard for drug and alcohol treatment waiting times.

Key points

- In October-December 2014, 96.0% of the 11,212 people who started their first drug or alcohol treatment waited 3 weeks or less (HEAT standard), a slight decrease from 96.9% in the previous quarter.
- 96.5% of the 7,179 people who started alcohol treatment between October-December 2014 waited 3 weeks or less, a slight change from 97.4% in the previous quarter.
- 95.0% of the 4,033 people who attended an appointment for drug treatment waited 3 weeks or less, a slight decrease from 96.1% in the previous quarter.
- Of the 2,391 people who were still waiting to start drug or alcohol treatment, 124 people, or 5.2%, had waited more than 6 weeks at the end of December 2014, compared to 74 people (2.5%) in the previous quarter.

- This publication does not include complete data for NHS Lothian due to issues moving to a new Patient Management System (PMS).

Background

The data in this publication is a snapshot of a dynamic database, which means that data for previous quarters may not be the same as found in previous publications for the same time period. Data for the most recent quarter is provisional and as such is subject to revisions in future publications.

Since 2011, data from treatment service providers has been collected in the Drug and Alcohol Treatment Waiting Times database. This allows the measurement of the full wait from referral to treatment for both drug and alcohol services as well as calculating the time a person waits for treatment. Information is also collected on whether the individual could not or did not attend offered appointments and allows for periods of unavailability to be recorded. Trend data for drug waiting times prior to April 2011 is not published as the current data is not comparable with data from the old system.

About ISD

Scotland has some of the best health service data in the world combining high quality, consistency, national coverage and the ability to link data to allow patient based analysis and follow up.

Information Services Division (ISD) is a business operating unit of NHS National Services Scotland - and has been in existence for over 40 years. We are an essential support service to NHSScotland and the Scottish Government Health Department and others, responsive to the needs of NHSScotland as the delivery of health and social care evolves.

Official Statistics

Information Services Division (ISD) is the principal and authoritative source of statistics on health and care services in Scotland. ISD is designated by legislation as a producer of 'Official Statistics'. Our official statistics publications are produced to a high professional standard and comply with the Code of Practice for Official Statistics. The Code of Practice is produced and monitored by the UK Statistics Authority which is independent of Government. Under the Code of Practice, the format, content and timing of statistics publications are the responsibility of professional staff working within ISD.

Further information on ISD's statistics, including compliance with the Code of Practice for Official Statistics, and on the UK Statistics Authority, is available on the [ISD website](http://www.isdscotland.org/About-ISD/About-Our-Statistics/) www.isdscotland.org/About-ISD/About-Our-Statistics/
