National Drug and Alcohol Treatment Waiting Times Summary
1 April - 30 June 2018
A National Statistics publication for Scotland

Publication date: 25 September 2018

About this release
This release by Information Services Division (ISD) reports on the waiting times for people accessing drug and alcohol treatment services between April and June 2018. It contains information on the number of people seen for treatment, types of treatment accessed and length of time waited. The Scottish Government’s Local Delivery Plan standard for drug and alcohol treatment states that 90% of people who need help with their drug or alcohol problem will wait no longer than three weeks for treatment that supports their recovery.

Main Points
• The quarterly trend over the past three years shows little change in performance. Of the 11,750 people who started their first treatment in the most recent quarter, 94.0% waited three weeks or less.
  - For the 6,927 people seeking alcohol treatment, 94.1% waited three weeks or less.
  - For the 4,823 people seeking drug treatment, 93.7% waited three weeks or less.

• Ten NHS Boards met the Local Delivery Plan standard. Four NHS Boards did not meet the standard: NHS Highland, NHS Lothian, NHS Shetland and NHS Tayside.

Percentage of people who started drug or alcohol treatment, within three and within five weeks, for all NHS Boards, between April and June 2018
• At the end of this quarter, 2,838 people were waiting to start their first drug or alcohol treatment, of which 241 (8.5%) had been waiting more than six weeks. This is an increase from the same quarter last year when 200 (6.6%) people were waiting more than six weeks.

• In prisons, 935 people started their first drug or alcohol treatment between April-June 2018 with 97.3% waiting three weeks or less.

• In the year ending March 2018 approximately 69.3% of the people starting drug or alcohol treatment were male.

Background
The data in this publication is a snapshot of a dynamic database. This means that data for previous quarters may not be the same as found in previous publications for the same time period. Data for the most recent quarter is provisional and may be revised in future publications.
