

# Publication Summary

## NHS Performs - Weekly Update of Emergency Department Activity and Waiting Times Statistics

Publication date – 23 June 2015

### About this Release

This release of [NHS Performs](#) includes official statistics sourced from aggregate figures supplied by NHS Boards to ISD Scotland on attendances at Emergency Departments (EDs) across Scotland. The information presented in this release continues the trend of statistics previously collected by the Scottish Government on the number of attendances, and length of time patients spend in EDs. An [excel spreadsheet](#) presenting information on all EDs within the same table is also available.

The statistics in this release cover only EDs (larger A&E services that typically provide a 24 hour consultant led service). Full information on the use of other units that provide A&E services such as minor injury units, small hospitals and health centres in rural areas is not currently included.

Complete information is reported through ISD Scotland's [monthly report on Accident and Emergency Activity and Waiting Times](#).

### Key Points

- During the week ending 14<sup>th</sup> June 2015:
  - There were 26,460 attendances at EDs across Scotland.
  - 92.2% of attendances at EDs were seen and subsequently admitted, transferred or discharged within 4 hours.
  - 140 (0.5%) patients spent more than 8 hours in the department
  - 16 (0.1%) patients spent more than 12 hours in the department.

### Background

Since 3 March 2015, the Scottish Government (SG) has released official statistics on [weekly A&E activity and waiting times information](#) for the EDs in Scotland, derived from aggregate information supplied by NHS Boards on the number of attendances and 4, 8, and 12 hour waits. ISD took over this data collection for statistics covering the week ending 7 June.

A National Statistics publication on A&E Activity and Waiting Times is released on the first Tuesday of every month. The statistics in the monthly publication are derived from the A&E datamart to which NHS Boards submit data as either episode level files containing a detailed record for each attendance or as aggregate files containing monthly summary attendance and compliance figures only. These statistics are subject to a higher level of quality assurance than the weekly statistics; however, there is good agreement between the two data sources. A comparison can be found online at [Emergency Care - Statistics](#).

Since 2007, the national standard for A&E waiting times is that new and unplanned return attendances at an A&E service should be seen and then admitted, transferred or discharged within four hours. This standard applies to all areas of emergency care such as EDs, assessment units, minor injury units, community hospitals, anywhere emergency care type activity takes place. A list of sites providing emergency care and their classification can be found online at [Emergency Care - Hospital Site List](#).

For information on how the Scottish Government (SG) monitors NHS Boards' performance within A&E Services, please see the [NHS Local Delivery Plan standards](#).

## Further Information

Further information can be found on the [Emergency Care](#) pages of the ISD Scotland website. A [metadata document](#) has been produced for this publication.

### About ISD

Scotland has some of the best health service data in the world combining high quality, consistency, national coverage and the ability to link data to allow patient based analysis and follow up.

Information Services Division (ISD) is a business operating unit of NHS National Services Scotland - and has been in existence for over 40 years. We are an essential support service to NHSScotland and the Scottish Government Health Department and others, responsive to the needs of NHSScotland as the delivery of health and social care evolves.

### Official Statistics

Information Services Division (ISD) is the principal and authoritative source of statistics on health and care services in Scotland. ISD is designated by legislation as a producer of 'Official Statistics'. Our official statistics publications are produced to a high professional standard and comply with the Code of Practice for Official Statistics. The Code of Practice is produced and monitored by the UK Statistics Authority which is independent of Government. Under the Code of Practice, the format, content and timing of statistics publications are the responsibility of professional staff working within ISD.

Further information on ISD's statistics, including compliance with the Code of Practice for Official Statistics, and on the UK Statistics Authority, is available on the [ISD website](#) [www.isdscotland.org/About-ISD/About-Our-Statistics/](http://www.isdscotland.org/About-ISD/About-Our-Statistics/)
