Publication Summary

Emergency Department Activity
and Waiting Times
Publication date – 7 July 2015

About this Release
This publication by the Information Services Division (ISD) for NHSScotland reports key statistics on attendances at Accident and Emergency (A&E) services across Scotland. The information presented in the publication includes trends in the number of attendances and admissions, and performance against the four hour waiting time standard. Detailed Hospital, NHS Board and Scotland information is available online.

Waiting times in A&E are subject to seasonal and random variation. For this reason, the publication includes rolling annual statistics covering a full year of data, and the key points include statistics based on the last 12 months.

There are 93 locations providing A&E services across Scotland. Of these, 30 are classed as Emergency Departments - larger A&E services that typically provide a 24 hour consultant led service. The 30 Emergency Departments are responsible for more than 8 out of every 10 A&E attendances, 19 out of 20 breaches of the four hour waiting time standard, and 19 out of 20 admissions from A&E to hospital.

The statistics in this National Statistics publication cover all A&E services, and include new data for May 2015.

Key Points

- During the month ending 31 May 2015:
  - There were 138,077 attendances at A&E services across Scotland.
  - 93.5% of attendances at A&E services were seen and subsequently admitted, transferred or discharged within 4 hours.
  - 862 (0.7%) patients spent more than 8 hours in the department.
  - 170 (0.1%) patients spent more than 12 hours in the department.
  - 26% of attendances led to an admission to hospital.

- The total number of attendances in the last 12 months (1 June 2014 to 31 May 2015), and over the same periods in the previous 2 years were:
  - Year ending 31 May 2015: 1,628,582
  - Year ending 31 May 2014: 1,628,339
  - Year ending 31 May 2013: 1,610,824
The percentage seen and subsequently admitted, transferred or discharged within four hours in the last 12 months (1 June 2014 to 31 May 2015), and over the same periods in the previous 2 years were:

- Year ending 31 May 2015: 92.0%
- Year ending 31 May 2014: 93.8%
- Year ending 31 May 2013: 93.4%

**Background**

The detailed A&E analysis is supplied online in an Excel Workbook with interactive tables and charts showing: number of attendances, over 4, 8 and 12 hour waits and destination on discharge from A&E by NHS Board, hospital and for all emergency departments (EDs). A data file (csv format) containing raw data at a low level of aggregation is also available.

Since 2007, the national standard for A&E waiting times is that new and unplanned return attendances at an A&E service should be seen and then admitted, transferred or discharged within four hours. This standard applies to all areas of emergency care such as EDs, assessment units, minor injury units, community hospitals, anywhere emergency care type activity takes place. A list of sites providing emergency care and their classification can be found online at [Emergency Care - Hospital Site List](#).

For information on how the Scottish Government (SG) monitors NHS Boards’ performance within A&E Services, please see the [NHS Local Delivery Plan standards](#).

Since 3 March 2015, official statistics on Emergency Department activity and waiting times information have been released weekly for the EDs in Scotland, derived from aggregate information supplied by NHS Boards on the number of attendances and 4, 8, and 12 hour waits. Initially, the SG carried out the collection. ISD took over the collection and publication of weekly A&E information for statistics covering the week ending 7 June 2015.

**Contact**

If you have any further questions about this publication, you can contact the team:
