Publication Summary

Care Home Census 2014
Statistics on Adult Residents
In Care Homes in Scotland
Publication date – 28 October 2014

About this Release
This publication presents findings from the March 2014 Scottish Care Home Census. Summary information is presented on the number of residents and places in care homes broken down by the different client groups, analysed at local authority level and providing data over time. This statistical release also presents more detailed information on long stay residents, e.g. length of stay, gender, age group, resident characteristics and average weekly charges.

Key Points

Care Homes for All Adults
• As at 31 March 2014 there were 1,249 care homes for adults in Scotland providing 42,502 places to 36,751 residents.
• The majority of care homes for adults, 711 (57 per cent), were run by the private sector, 353 (28 per cent) were run by the voluntary sector and 185 (15 per cent) were run by local authorities or NHS Boards.

Care Homes for Older People
• As at 31 March 2014 there were 902 care homes for older people (those aged 65 or older) providing 38,441 places to 33,187 residents, of whom 31,943 were long stay residents (96 per cent).
• The total numbers of short stay and respite care residents increased from 789 in March 2005 to 1,244 in March 2014, an increase of 58 per cent.
• 53% of long stay residents in care homes for older people had a formal diagnosis of dementia. This is an increase of 79 per cent since the March 2005 census. Over the same time period the percentage of residents who have been identified as having dementia but not formally diagnosed has decreased from 14 per cent to 8 per cent.
• At 31 March 2014 around a third of residents had been in the care home for more than three years. The median length of stay is around two years and has remained unchanged for the last ten years.
• The average weekly charge for self-funding long stay residents without nursing care was £683 per week, an increase of 4 per cent since the last census period. The average...
weekly charge for self funding long stay residents with nursing care was £754, which is also an increase of 4 per cent from the previous year.

**Care Homes for Other Main Client Groups**
- The number of long stay residents in care homes for adults with learning disabilities fell from 2,333 in March 2005 to 1,539 in March 2014, a decrease of 34 per cent.
- The majority of registered places for adults with physical disabilities, 440 (68 per cent), were provided by the voluntary sector.

**Background**
The Scottish Care Home census is intended to cover all adult care home establishments that are registered with the [Care Inspectorate](https://www.careinspectorate.org.uk). The Care Inspectorate is responsible for regulating a wide range of social services. This census was first issued in March 2003 and replaced two previous surveys. It combined the former ‘Residential Care Home Census – R1’ (run by the Scottish Government) and the ‘Private Nursing Homes Census’ (run by ISD Scotland). In March 2006 some of the data collection, relating mainly to care home places, was taken over by the Care Inspectorate.

### About ISD
Scotland has some of the best health service data in the world combining high quality, consistency, national coverage and the ability to link data to allow patient based analysis and follow up.

Information Services Division (ISD) is a business operating unit of NHS National Services Scotland - and has been in existence for over 40 years. We are an essential support service to NHSScotland and the Scottish Government Health Department and others, responsive to the needs of NHSScotland as the delivery of health and social care evolves.

### Official Statistics
Information Services Division (ISD) is the principal and authoritative source of statistics on health and care services in Scotland. ISD is designated by legislation as a producer of ‘Official Statistics’. Our official statistics publications are produced to a high professional standard and comply with the Code of Practice for Official Statistics. The Code of Practice is produced and monitored by the UK Statistics Authority which is independent of Government. Under the Code of Practice, the format, content and timing of statistics publications are the responsibility of professional staff working within ISD.

Further information on ISD’s statistics, including compliance with the Code of Practice for Official Statistics, and on the UK Statistics Authority, is available on the [ISD website](#) www.isdscotland.org/About-ISD/About-Our-Statistics/
