

Publication Summary

Acute Hospital Activity

and

NHS Beds information;

Quarter ending June 2011

Publication date – 27 September 2011

About this Release

This release comprises a quarterly summary of inpatient, day case and outpatient activity and beds statistics for NHSScotland up to June 2011. In addition to these quarterly tables, the release also includes an annual available beds summary up to the year ending March 2011 and an annual summary of inpatient, day case and outpatient activity up to the year ending March 2011. Revised annual emergency admissions and bed days figures for patients aged 65 and revised annual figures, up to March 2010, for the new HEAT target on emergency bed days for patients aged 75 and over.

Any missing or incomplete data has been estimated using the last complete data submission for the relevant NHS Boards. Details of the affected data can be found within the [Full Publication Report](#) and are highlighted within the relevant tables.

Key Points

- The total number of acute hospital discharges (episodes) was around 1,419,000 for the financial year ending 31 March 2011, this is an increase of 1.1% on the previous year.
- There were around 350,000 acute inpatient and day case discharges in the quarter ending June 2011. This is a decrease of 2.1% when compared to the same quarter of the previous year.
- The total number of outpatient attendances at consultant clinics was around 4,538,000 in the year ending March 2011, showing a slight decrease of 0.5% when compared to year ending March 2010
- The total number of outpatient attendances in the quarter ending June 2011 was around 1,142,000. This is a very slight decrease on the quarter ending June 2010.

- The average number of available staffed beds in acute specialties was recorded as 16,685 in the year ending March 2011 and was 17,099 in the year ending March 2010. Over the same time period the average length of stay has reduced from 5.5 to 5.3 days.
- The average number of available staffed beds in acute specialties was recorded as 16,603 in quarter ending June 2011 and was 16,909 in the quarter ending June 2010.
- There has been a decrease of 3.0% in the emergency bed days rate per 1,000 population for patients aged 75+ from 5,529 to 5,365 between 2008/09 and 2009/10.

Background

Outpatient, inpatient and day case activity data and beds information are collected across NHSScotland and are based on nationally available information routinely drawn from hospital administrative systems across the country.

Due to issues associated with the supply of complete and comprehensive data from a number of NHS Boards, ISD have delayed the publication of the majority of the detailed Annual Acute Hospital Activity Information which were scheduled to be included in this release. ISD are working with NHS Boards to resolve these data submission issues. Most of the issues have resulted from the implementation of the new PMS TrakCare system. Further details of these issues can be found [here](#).

The data contained within this publication are predominantly based on ISD(S)1 aggregate data returns. ISD(S)1 contains summarised data by NHS Board of Treatment, hospital and specialty, i.e. high level reports with no patient details.

Further Information

Further information can be found in the [Full Publication Report](#) or on the [Acute Hospital Activity](#) pages of the [ISD website](#).

About ISD

Scotland has some of the best health service data in the world combining high quality, consistency, national coverage and the ability to link data to allow patient based analysis and follow up. Information Services Division (ISD) is a business operating unit of NHS National Services Scotland - and has been in existence for over 40 years. We are an essential support service to NHSScotland and the Scottish Government Health Department and others, responsive to the needs of NHSScotland as the delivery of health and social care evolves.

Official Statistics

Information Services Division (ISD) is the principal and authoritative source of statistics on health and care services in Scotland. ISD is designated by legislation as a producer of 'Official Statistics'. Our official statistics publications are produced to a high professional standard and comply with the Code of Practice for Official Statistics. The Code of Practice is produced and monitored by the UK Statistics Authority which is independent of Government. Under the Code of Practice, the format, content and timing of statistics publications are the responsibility of professional staff working within ISD.

Further information on ISD's statistics, including compliance with the Code of Practice for Official Statistics, and on the UK Statistics Authority, is available on the [ISD website](#).
