

Publication Summary

Acute Hospital Activity and NHS Beds Information

Quarter ending March 2013

Publication date – 25 June 2013

About this Release

This release comprises a quarterly summary of inpatient, day case and outpatient activity and bed statistics for NHS Scotland up to March 2013. It also includes revised annual emergency admissions and bed day figures up to March 2012 for the HEAT target on emergency bed days for patients aged 75 and over.

Key Points

- There were around 364,000 acute inpatient and day case discharges in the quarter ending March 2013. This is a reduction of around 1.7% from the same quarter of the previous year.
- The total number of outpatient attendances in the quarter ending March 2013 was around 1,148,000. This is a reduction of around 3.6% on the quarter ending March 2012.
- The number of available staffed beds in acute specialties was recorded as 16,436 in the quarter ending March 2013. This is a reduction of 0.6% from 16,538 beds in March 2012.
- The rate of emergency bed days per 1,000 patients aged 75 and over reduced by 6.8% from 5,393 in 2009/10 to 5,027 in 2011/12.

Background

Outpatient, inpatient and day case activity data and beds information are collected across NHSScotland and are based on nationally available information routinely drawn from hospital administrative systems across the country.

The data contained within this publication are predominantly based on ISD(S)1 aggregate data returns. ISD(S)1 contains summarised data by NHS Board of Treatment, hospital and specialty, i.e. high level reports with no patient details.

Where possible, any missing or incomplete data has been estimated using the last complete data submission for the relevant NHS Boards. Details of the affected data can be found within the [Full Publication Report](#) and are highlighted within the relevant tables. Data for the latest time periods should therefore be treated as provisional.

About ISD

Scotland has some of the best health service data in the world combining high quality, consistency, national coverage and the ability to link data to allow patient based analysis and follow up. Information Services Division (ISD) is a business operating unit of NHS National Services Scotland - and has been in existence for over 40 years. We are an essential support service to NHSScotland and the Scottish Government Health Department and others, responsive to the needs of NHSScotland as the delivery of health and social care evolves.

Official Statistics

Information Services Division (ISD) is the principal and authoritative source of statistics on health and care services in Scotland. ISD is designated by legislation as a producer of 'Official Statistics'. Our official statistics publications are produced to a high professional standard and comply with the Code of Practice for Official Statistics. The Code of Practice is produced and monitored by the UK Statistics Authority which is independent of Government. Under the Code of Practice, the format, content and timing of statistics publications are the responsibility of professional staff working within ISD.

Further information on ISD's statistics, including compliance with the Code of Practice for Official Statistics, and on the UK Statistics Authority, is available on the [ISD website](#).
