Quarterly Acute Hospital Activity and NHS Beds Information for Scotland

Quarter ending 30 June 2018

A National Statistics publication for Scotland

Publication date: 30 October 2018

About this release

This release by Information Services Division (ISD) provides an update on a range of statistics on different aspects of hospital care, sourced from hospital administration systems across Scotland. These include information on trends in outpatient activity; inpatient and day case activity; and beds statistics. Data presented for 1 April to 30 June 2018 are provisional and subject to change in future publications as submissions may be updated to reflect a more accurate and complete set of data from NHS Boards. There are known issues with the quality of data presented which are summarised within the Data Quality Section.

Main Points

Inpatients and Daycases

Inpatient and daycase activity (hospital stays) for acute services in NHSScotland, for quarters ending June 2013 to June 2018p

There were over 260,000 (266,478) hospital admissions between 1 April to 30 June 2018. Of these, 47% (124,338) were emergency admissions; 12% (33,082) elective admissions; 40% (107,728) daycases and 1% (1,330) transfers.
Beds

There were on average just over 13,200 (13,239) available staffed beds for all acute specialties in the quarter ending 30 June 2018. An available staffed bed is one that is available for inpatient or daycase care. For all acute specialties in quarter ending 30 June 2018, the percentage occupancy was 87%.

Outpatients

There were just over 1 million (1,074,112) outpatient attendances between 1 April to 30 June 2018. Of these, 34% (362,581 attendances) were new cases. The remaining 66% (711,531 attendances) were patients returning for follow up appointments. 8% of new outpatient appointments were not attended without prior warning (‘Did Not Attends’).

Background

Full definitions of outpatients, hospital admissions and available staffed beds are available in the Glossary Section. Further details are also available on the ISD Data Dictionary.

Further Information

This publication is the first ISD publication to be developed as part of the Transforming Publishing Programme (TPP). For the December 2017 release, the new version of the publication was provided alongside the original format. A consultation survey was undertaken to seek views on this new platform release which closed on the 28 February 2018. An overview of the responses and other feedback received is accessible within the consultation report.

From March 2018 onwards, this new version has replaced the previous format and is the sole release of the Quarterly Acute Hospital Activity and NHS Beds data. Disclosure control methods have been applied to the data in order to protect patient confidentiality, therefore some figures on total counts may not be additive. The next release of Quarterly Acute Hospital Activity and NHS Beds Information in Scotland will be in December 2018.

NHS Performs

A selection of information from this publication is included in NHS Performs. NHS Performs is a website that brings together a range of information on how hospitals and NHS Boards within NHSScotland are performing.

ISD and Official Statistics

Information Services Division (ISD) is the principal and authoritative source of statistics on health and care services in Scotland. ISD is designated by legislation as a producer of ‘Official Statistics’. Our official statistics publications are produced to a high professional standard and comply with the Code of Practice for Official Statistics. Further information about our statistics.
