About this Release

New data on the health and wellbeing of Scotland’s older people (aged 75+) has been published in an update to the ScotPHO Online Profiles Tool.

This is the second in a series of profiles relating to older people and provides information for both NHS boards and Local Authorities. The purpose of these reports is to provide service providers, planners and policy makers with the robust information they need to improve understanding of health and social care issues (relating to older people), to set these issues in a national context and to take action to improve the health and wellbeing of communities.

The individual reports are based on a set of 20 indicators, covering secondary care (e.g. hospitalisations and outpatient attendances), behaviour (e.g alcohol use) and wider determinants of health (e.g. economy, social care and caring.)

These are the second in a series of profiles relating to older people with separate profiles for age groups 65+ and 85+. We also plan to add to the existing indicator list to include data from the census, as and when it becomes available.

Background

The ScotPHO online profiles tool forms a part of the ScotPHO website. The ScotPHO website contains comprehensive information on a wide range of topics grouped into sections including: Behaviour; Health, wellbeing and disease; and Clinical risk factors. Along with summary data and statistics, the website provides background information, interpretation, policy notes, commentaries on data sources, references and links to further information.

**About ISD**

Scotland has some of the best health service data in the world combining high quality, consistency, national coverage and the ability to link data to allow patient based analysis and follow up. Information Services Division (ISD) is a business operating unit of NHS National Services Scotland - and has been in existence for over 40 years. We are an essential support service to NHSScotland and the Scottish Government Health Department and others, responsive to the needs of NHSScotland as the delivery of health and social care evolves.

**About ScotPHO**

The Scottish Public Health Observatory (ScotPHO) collaboration is led by ISD Scotland and NHS Health Scotland, and includes the Glasgow Centre for Population Health, National Records of Scotland and Health Protection Scotland. Our aim is to make public health information more accessible and usable to improve health and reduce inequalities in Scotland. Metadata and pre-release access information for this publication is available [here](#).

**Official Statistics**

Information Services Division (ISD) is the principal and authoritative source of statistics on health and care services in Scotland. ISD is designated by legislation as a producer of ‘Official Statistics’. Our official statistics publications are produced to a high professional standard and comply with the Code of Practice for Official Statistics. The Code of Practice is produced and monitored by the UK Statistics Authority which is independent of Government. Under the Code of Practice, the format, content and timing of statistics publications are the responsibility of professional staff working within ISD.

Further information on ISD’s statistics, including compliance with the Code of Practice for Official Statistics, and on the UK Statistics Authority, is available on the [ISD website](#) [www.isdscotland.org/About-ISD/About-Our-Statistics/](http://www.isdscotland.org/About-ISD/About-Our-Statistics/)
