Cervix & Endometrial Cancer Quality Performance Indicators

Patients diagnosed in the three years from October 2014 to September 2017

An Official Statistics publication for Scotland
Publication date: 18 December 2018

About this release

This release by Information Services Division is the first publication of the National Cervix and Endometrial Cancer Quality Performance Indicators. The report assesses performance against thirteen indicators developed by gynaecology cancer specialists working in Scotland. The information reported has been collected from clinical audits. This report provides an opportunity to review NHSScotland performance against these measures.

Main Points

Cervical Cancer

- There were 281 women diagnosed with Cervical Cancer in Scotland over the period October 2016 to September 2017. This is a reduction from the previous years where 304 were diagnosed in year 2 and 353 in year 1.
- At a Scotland level for 2016/17, the target was met in three of the seven indicators with four below target. This is a reduction from year one where 4 of the 7 indicators met the target.

Endometrial Cancer

- There were 746 women diagnosed with Endometrial Cancer in Scotland over the period October 2016 to September 2017. This is a slight reduction from year 2 where 753 were diagnosed but higher than year 1 (678).
- At a Scotland level for 2016/17, the target was met in four of the six indicators with two below target. This is an improvement from year one where 2 of the 6 indicators met the target.
Further Information

Report

- National report on Cervix & Endometrial Cancer Quality Performance Indicators
- Supporting data tables and graphs illustrating the figures for Cervical and Endometrial can also be downloaded.

Cervix & Endometrial Cancer Indicators

- Documents detailing the cervical cancer and endometrial cancer indicators are available from Healthcare Improvement Scotland

Cancer Quality Performance Indicators

- Information Services Division: Cancer Quality Performance Indicators
- For more information on the National Cancer Quality Programme - Scottish Government letter CEL 06 2012.

The next release of cervix and endometrial cancer quality performance indicators in December 2021 may include changes or refinements to indicator definitions and measurability criteria based on a review of this first publication.
