Adult Mental Health Benchmarking Toolkit

A Management Information publication for Scotland

Publication date: 15 January 2019

About this release

This release by Information Services Division (ISD) presents data up to 31 March 2017 in the Adult Mental Health Benchmarking Toolkit. The Toolkit aims to improve Mental Health Services through the use of benchmarking. This enables services to understand and compare their outcomes and promote best practice. The toolkit contains information on financial, prescribing, workforce and psychiatric hospital activity. It is primarily adult focused, based on General Psychiatry and Psychiatry of Old Age specialties, and excludes Child and Adolescent Psychiatry, Learning Disabilities and Forensic Psychiatry services. However, for certain indicators data are not available at an adult only level and may pertain to the wider Mental Health service Links to the data contained within the toolkit can be found within the links tab.

ISD propose that this will be the penultimate release of the Toolkit in its current format. The final release will be in March 2019 featuring data to 31 March 2018. ISD will replace the Toolkit with a biannual release of the Quality Indicators as set out in the 2017 10 year Mental Health Strategy for Scotland. We would welcome feedback on this proposal using the contact details at the end of this publication, more information can also be found on our consultation page.

Main Points

Based on the available data for the financial year ending March 2017:

- The total (net) expenditure for general psychiatry services for 2016/17 was just under £937 million for NHS Scotland. This is an increase of around 1% from £929 million in 2015/16.
- The total number of staff for General Psychiatric services per 100,000 population in 2017 was 198.6 WTE/100,000. This was an increase from 196 WTE per 100,000 population in 2016.
- In 2016/17 the average length of stay for mental health care in Scotland was 69.8 days. This represents a decrease from 76.2 days in 2015/16.

Background

This information helps to facilitate improvement of Mental Health services in Scotland by using a range of comparative information to compare key aspects of performance, identify gaps, identify opportunities for improvement and monitor progress. It comprises all available data for the relevant indicators split across the Quality Strategy themes of Efficient, Effective, Person-centred, Safe, Equitable and Timely.
