About this release

This release by Information Services Division (ISD) presents the quarterly update of Cancer Waiting Times statistics. It reports on the two waiting times standards used to measure the time patients have waited for their first cancer treatment. Data for the quarter ending March 2018 are presented by NHS Board, Regional Cancer Network and cancer type.

Main Points

The **62 Day Standard** states that 95% of patients urgently referred with a suspicion of cancer will wait a maximum of 62 days from referral to first cancer treatment

- 85.0% of patients started treatment within the 62 day standard, compared to 87.1% in the previous quarter and 88.1% for quarter ending March 2017.
- The 62 day standard was met by three\(^3\) NHS Boards: NHS Borders, NHS Lanarkshire and NHS Shetland.

The **31 Day Standard** states that 95% of all patients will wait no more than 31 days from decision to treat to first cancer treatment

- 93.5% of patients started treatment within the 31 day standard, which is a decrease from 94.6% in the previous quarter and from 94.9% for quarter ending March 2017.
- The 31 day standard was met by ten NHS Boards. It was not met by NHS Grampian, NHS Greater Glasgow and Clyde, NHS Highland, NHS Lothian and NHS Tayside.

---

1. Please note that the vertical axis on this chart does not start at the origin (zero).
2. Filled points indicate quarter in which standard was met.
3. NHS Dumfries & Galloway: Due to a data submission error reported after the data snapshot (18/05/2018), the 62 day standard was met by four NHS Boards.
Background
In October 2008, the Scottish Government published Better Cancer Care – An Action Plan. The statements in the Action Plan formed the basis for the current standards for cancer waiting times where 95% of all eligible patients should wait no longer than 31 or 62 days. A 5% tolerance level was applied to these targets as, for some patients, it may not have been clinically appropriate for treatment to begin within target. In March 2016, the Scottish Government published Beating Cancer: Ambition and Action.

ISD works in partnership with the Scottish Government Cancer Performance Support Team and NHS Boards to measure NHS Scotland’s performance against the National Standards and to provide a wide range of users with faster access to the statistics they need.

The standards are based on the 10 main cancer types: breast, colorectal, head & neck, lung, lymphoma, ovarian, melanoma, upper gastro-intestinal (hepato-pancreato-biliary and oesophago-gastric), urological (prostate, bladder, other) and cervical.

Golden Jubilee National Hospital is only able to supply data for the 31 day standard as they are not in a position to refer patients but are involved in the treatment stage.

The figures presented are based on patient based data taken at snapshot (18 May 2018). The following health boards advised slight changes to their data following snapshot, NHS Dumfries & Galloway, NHS Greater Glasgow & Clyde, NHS Lanarkshire and NHS Orkney. Please see Appendix 2 of the main report for further details. Figures will be updated in the next publication (September 2018) as required.

Please see News and Updates section of our website for more details.
