About this release
This release by Information Services Division gives a quarterly update on how long patients wait for Musculoskeletal (MSK) services that are delivered by Allied Health Professionals (AHP) in Physiotherapy, Occupational Therapy, Chiropody/Podiatry and Orthotics. These data are considered developmental and progress continues to be made with all NHS Boards who are developing their IT systems in order to provide data for all indicators.

Main Points

- Half (49.9%) of the 81,762 patients who had a first clinical appointment with an AHP MSK service were seen within 4 weeks for quarter ending 30 June 2018.

- There were 114,967 referrals to AHP MSK services in this quarter.
- Over a third (38.9%) of the 78,317 patients waiting for a first clinical appointment with an AHP MSK service had been waiting 4 weeks or less at 30 June 2018.
**Background**

MSK problems include a diversity of complaints and diseases localised in joints, bones, cartilage, ligaments, tendons, tendon sheaths, bursa and muscles. MSK problems also include outpatient pre or post orthopaedic surgery, peripheral nerve lesions (e.g. carpal tunnel, sciatica) or complication of fracture/dislocation/trauma.

The Scottish Government has determined that at least 90% of AHP MSK patients should wait no longer than 4 weeks from receipt of referral from a patient or health or social care professional. See [NHSScotland Waiting Times Guidance](#) for more information. The guidance target should be met by each profession individually within each NHS Board.

11 Boards provided information for this quarter through the national system. NHS Ayrshire & Arran, NHS Highland and NHS Tayside provided local figures to inform this release. [Further information](#) regarding NHS boards submitting data is available.

Please see [News and Updates section](#) of our website for more details.
