About this release

This release by Information Services Division (ISD) provides a monthly update on the number of patients in NHSScotland who have had their planned hospital operation cancelled the day before, or on the day of their planned operation and the reason for this cancellation.

Main points

- The total number of planned operations across NHSScotland during February 2019 was 27,741, an increase of 5.1% from 26,383 during February 2018.
- 2,457 operations (8.9% of all planned operations) were cancelled in February 2019, ranging from 5.2% to 14.3% across individual NHS Boards. This compares to 2,719 (10.3%) in February 2018.
- In February 2019, of all 27,741 planned operations: 875 (3.2%) were cancelled by the patient; 879 (3.2%) were cancelled by the hospital based on clinical reasons; 571 (2.1%) were cancelled by the hospital due to capacity or non-clinical reasons; 132 (0.5%) were cancelled due to other reasons.
- The peak in cancellations for non-clinical/capacity reasons in November 2018 (3.4%) relates to the unplanned, temporary closure of the Cowlairs decontamination unit in NHS Greater Glasgow & Clyde. The spikes in March 2018 for non-clinical/capacity reasons (4.1%) and other reasons (1.5%) were due to poor weather affecting patient and staff travel.
**Background**

These statistics are released monthly. Data for this publication are submitted from NHS Board theatre systems.
