**Background**

There is a strong evidence base for the effectiveness of psychological interventions in delivering positive health change for a wide range of clinical conditions. Healthcare policy in Scotland has endorsed a shift towards a greater emphasis on psychologically based approaches. These offer a scientific basis for understanding, and practical skills for influencing, how people think, feel and behave, with specific reference to physical health and mental well being.

This release is collaboration between NHS Education for Scotland (NES) and the Information Services Division (ISD). NES has responsibility for the pre-registration training of Clinical Psychologists for NHSScotland which is the main source of psychology workforce supply. NES also has responsibility for commissioning two masters level training courses aimed at enhancing the skill mix; MSc Psychological Therapy in Primary Care and MSc Applied Psychology in Children and Young People.
